2006 IUFRO Workshop on Nondestructive Testing of Wood

Hosted and organized by Northeast Forestry University (China) and the International Union of Forest Research Organization (IUFRO) Unit D5.02.01

**at
College of Engineering and Technology
Northeast Forestry University
Harbin, China
August 7 – 9, 2006**

You are invited to attend the **2006 IUFRO Workshop on Nondestructive Testing of Wood** to be held in Harbin, China in August 7-9, 2006. The purpose of this workshop is to provide a platform for researchers, engineers, and foresters to present the most recent research advancements and refinements of Nondestructive Testing (NDT) technologies for quality evaluation of trees, raw materials, and various wood products. Several international NDT experts will be invited to give keynote presentations. A training session will be offered for participants to get hands-on experience of various state-of-the-art NDT techniques for wood property characterization and defect/decay detection.

Topics:

Paper and poster presentations in the following areas are invited to participate in this Workshop:

1. Tree/Log Quality Evaluation
2. Urban Tree Decay Detection
3. Nondestructive Evaluation of Structural Timber and Engineered Wood Products
4. Condition Assessment of Historical Wood Structures
5. Other NDT related areas
