FORWARD

The Extension Working Party (6.06.03) of IUFRO serves as a forum for communications among Extension forestry professionals worldwide. Extension is used rather loosely in this context, and includes the broad subject area of “educating people to use forest technology to improve their lives and livelihoods.” If you wish to make additions, deletions, or corrections, please send them to me, and I will include them in the next edition.

Hopefully, this sixth edition will serve as an aid for more interaction among Extension workers. Please feel free to copy it and distribute it as widely as possible. I will provide additional copies on request, as long as the supply lasts.

This directory is also available at

A handwritten signature in black ink that reads "James E. Johnson". The script is cursive and fluid, with the first letters of each word being capitalized and prominent.
