Governing and managing forests for multiple ecosystem services across the globe

Governing and managing forests for multiple ecosystem services has for a long time been an important paradigm.

A variety of forest management concepts have been developed to accommodate distinct social demands in different contexts. All these forest management approaches are embedded in a complex policy framework.

Major global challenges such as climate change, biodiversity loss, rising demands for products and services due to global population and economic growth, and urbanisation affect how these approaches are implemented.

The conference will debate the following questions:

- What is the current state of integrated forest management, including global scale approaches?
- What are the trade-offs and synergies between forest ecosystem services and how are they perceived, governed and managed across Europe and beyond?
- What is the impact of such management concepts on the ecological structure and interactions in forests?

Bonn, Germany
February 26-28, 2020

http://informar.eu/final-conference
The conference is organised by INFORMAR and POLYFORES, with support from ConFoBi, Oforest, Swiss Forest Lab, Sincere, ForBioeconomy and NFZforestnet.

Several international organizations are cooperating for the setting up of the event: SLU, University of Freiburg, BOKU, CTFC, NMBU, CEPF, CIFOR, WSL, KU Leuven, University Padova-TESAF, INRA-Nancy, IUFRO.

**Conference keynotes by**

Jette Bredahl Jacobsen  
Copenhagen University

Natalia Lukina  
Russian Academy of Sciences Moskau

Christian Messier  
Université du Québec à Montréal

Robert Nasi  
Center for International Forestry Research

Eeva Primmer  
Finnish Environment Institute SYKE

Klaus Puettmann  
Oregon State University

Ulrich Schraml  
Forest Research Institute of Baden-Württemberg

Antoni Trasobares  
Forest Sciences Centre of Catalunia

The conference is organised by **INFORMAR** and **POLYFORES**, with support from ConFoBi, Oforest, Swiss Forest Lab, Sincere, ForBioeconomy and NFZforestnet.
