

TABLE OF CONTENTS

- 1. Pest problems in planted forests (Session 7.03.03)
Moderators: Keith Day, Scott Salom
 - Henry, C.J., K. R. Day: Biocontrol of the large pin weevil: structure of host (*Hylobius abietis* [L.]) and parasitoid (*Bracon hylobii* Ratz.) populations in felled stumps of Sitka spruce.
 - Alfaro, René I. John N. King, Yousry A El-Kassaby, George Brown and
 - Kornelia Lewis: Use of artificial infestations in the selection of sitka spruce genotypes for resistance to the white pine weevil in British Columbia, Canada.
 - Foahom, B. : Approach for an efficient control of defoliating insect damage: case of *Godasa sidae* (F.) (Lep. Noctuidae) attacks on *Mansonia altissima* A chev. (Sterculiaceae).
 - Straw, N.A. : The impact of green spruce aphid (*Elatobium abietinum* (Walker)) on young and mature spruce plantations.
 - Cobbinah, J.R., M.R. Wagner: Insect problems in plantations in the equatorial rain forests of Africa.
- 2. Invasive insects and diseases (Session 7.03.07)
Moderators: Hugh Evans, Andrew Liebhold
 - Bergdahl, D.R., S. Halik: Butternut canker: an exotic threat to *Juglans cinerea*.
 - Evans, H.F., R.H.A. Baker and A. MacLeod: Evaluating the risk of invasion by potential forest pests.
 - Humble, L.M. : Invasive bark and wood-boring beetles in British Columbia, Canada.
 - Nunotani, H., K. Kawasaki, F. Takasu, K. Togashi and N. Shigesada: Spatial spread of pine wilt disease: modeling the dispersal distance distribution of the Pine Sawyer beetle, *Monochamus alternatus*.
 - Salom, S.M., M.S. McClure, M.E. Montgomery, G. Zilahi-Balogh and
 - L.T.Kok: Hemlock woolly adelgid in the United States: status of ongoing biological control efforts.
 - Turcani, M., G. Csoka, W. Grodzki and P. Zahradnik: Recent invasions of exotic forest insects in eastern central Europe.
 - Wingfield, M.J., B. Slippers, Z. Xu Dong, W. de Beer, P. Govender and B.D. Wingfield: Global spread of insect associated fungi on exotic plantation pines.
- 3. Mechanisms of tree resistance to insect pests (Session 7.01.02)
Moderators: François Lieutier, Mike Wagner
 - Clancy, K.M. : Biochemical characteristics of douglas-fir trees resistant to damage from the western spruce budworm: patters from three populations.
 - Baier, Peter, Christa Schafellner, Erwin Fuhrer, Jutta Mattanovich: Host tree - bark beetle interactions: effects of restoration of secondary Norway spruce (*Picea abies* [L.] Karst.) on food quality for *Ips typographus* L. (Scolytidae).

- Paiva, M.R., E. Mateus, J. Munha, C. Pimentel, M.H. Farrall: Pinus spp. chemical composition and host selection by the winter pine processionary moth.
- 4. Epidemic factors and global spread of pine wilt (Session 7.02.11):
Moderators: Kazuyoshi Futai, Kazuo Suzuki
 - I Epidemic Factors of Pine Wilt
 - Togashi, K. : Insect vector-nematode relationship and virulence of nematode against host plants.
 - Ikeda, T. : Wilt disease-induced xylem embolism in trees
 - Yamane, A., R. Iwata: Recent advances in studies on chemical ecology and behavior of the Japanese pine sawyer adult.
 - Fukuda, K., S. Ugawa, Y. Ichihara and K. Suzuki: Mycorrhizal fungal flora in pine forests infested with pine wilt disease.
 - Kosaka, H., T. Aikawa, N. Ogura, K. Tabata and T. Kiyohara: Induced resistance of pine trees against pine wilt disease by a virulent nematode inoculation.
 - II Global Spreading of Pine Wilt
 - Kulinich, O.A., P.D. Orlinski: Pathogenicity and possible adaptation of the pinewood nematode, *Bursaphelenchus xylophilus*, in central European Russia.
 - Magnusson, C. : Strategy of protection of European forests from pinewood nematodes
 - Bergdahl, D.R., S. Halik: Pine wilt disease: a potential threat to coniferous forests around the world.
 - Futai, K. : Unsuccessful experience in controlling the pine wilt in Japan.
 - Webster, J.M. : Pinewood nematode: characteristics and hazards of its global impact.
- 5. Management of insect pest in the tropics (Session 7.03.09):
Moderators: K.S.S. Nair
 - Schabel, H.G., S. Madoffe: Status and management of small coleopterous borers in living timbers in tropical Africa.
 - Nair, K.S.S. : Management of the Teak defoliator, *Hyblaea puera* - current status.
 - Lapis, E.B. : Outbreak of the ambrosia beetle, *Platypus* sp., in *Avicennia marina* in the Philippine mangrove forest.
 - Dey, R.K. : Management of the sal heartwood borer, *Hoplocerambyx spinicornis* in India.
 - Hutacharern, C. : Teak beehole borer, *Xyleutes ceramica*: ecology and management
